

IBM Watson Health

Arria NLG's **Professor Ehud Reiter** invited to speak at IBM Watson Health Event on **Ecosystem Insights** >

Professor Ehud Reiter, Chief Scientist at Arria NLG, will be discussing ways in which Artificial Intelligence can impact the healthcare ecosystem at the IBM Watson Health event on Thursday, March 3. [Event Details](#) >

Leading organizations around the world are collaborating to address the intersection of healthcare and how artificial intelligence, and emerging technologies such as Natural Language Generation (NLG) have the power to improve the existing healthcare ecosystem. NLG technology provides healthcare with intelligent reporting assistants to communicate what the data is telling us in a quicker, more efficient and user-friendly way. NLG technology can also empower healthcare professionals and patients with new insights about the patient's health and treatment. [View Press Release](#) >

A background image showing a group of hikers with large backpacks walking across a field of tall grass at sunset. The sun is low on the horizon, creating a warm, golden glow. The hikers are silhouetted against the bright sky.

“Arria’s NLG technology will be a great empowering tool for people in everyday life, giving them understandable access to medical information about themselves in a form and language that is appropriate for them.”
