### Here's the top 10 digital technologies the boss should know about

The technical landscape is changing shape faster than ever and it can be hard to navigate, so here's a helpful guide to the future...

#### NATURAL LANGUAGE GENERATION - NAMED #6

When will computers learn to talk? The answer is that they pretty much do. The Met Office weather reports online are entirely written by a natural language engine developed by AIM-listed Arria. Reuters uses a computer to turn financial data into prose. Hospitals are using the tech to write patient reports. Mechanical devices such as wind turbines are writing status reports for engineers in plain English. [Read More >](#)
